

Faster, Safer, and more Effective Migration to the new SAP SuccessFactors Onboarding

SAP will sunset the SuccessFactors Onboarding 1.0 solution in the H1 2026 release.

Migration to the new Onboarding solution requires a re-implementation which is **complex** and **resource-intensive**, with **limited skill availability** in the partner ecosystem.

To address these challenges, TSP has brought together RPA and proprietary accelerators into a cohesive solution that automates large parts of the migration.

TSP's Onboarding Migration Automation Solution

Leverage TSP's expertise to determine new onboarding capabilities and optimize transformation opportunities. The technical solution reduces time and effort by automating the documentation of requirements, configuration, migration of onboarding documents, testing, and cutover.

The solution works using a 3-step process

Design Workshops are held to identify opportunities for transforming Onboarding, Crossboarding, and/or Offboarding processes

Benefits of using this Solution

40-60% reduction in cost, and **35%** reduction in timeline achieved with the TSP's **methodology**, **10+ accelerators**, and **automation** of the following configuration items:

Furnish
Equipment

Picklists

Day One Lists

Responsible
Groups

Programs

Custom PDF
Forms

And More
